DIREZIONE
DELL'ORTO BOTANICO
DELLA R. UNIVERSITÀ DI PISA

15 Nov? 1896

My dear Professor

The first 3 volumes of the Giornale botanico were sent you by Dr. Saccardi, and you must apply to him for the missing numbers (Borgo Pegolaia, 48, Firenze); or indeed I shall write to him myself to-day about it. The succeeding volumes were sent by myself, after I had become the editor; the II and V I sent by post as far as I can recollect, and will send again immediately the 2 missing numbers. the VI and VII I forwarded to the Smithsonian through their agent in Italy the Rockfeller Hoepli a Milan, so pray enquire about them, and if they have not been received let me know

and I shall send them again.

I don't well understand the request of yr friend the Editor of the American Naturalist. If he wishes to have another copy of my Giornale besides the one I send you in exchange for this, I shall willingly send it to him; as also all preceding volumes from the 11th Issue let me know more exactly.

Believe me

Yours sincerely.

T. Caruel

Many thanks for the continuation of yr botanical contributions.
